## **Cardinal Security Handbook**

The Cardinal Security Handbook should be used in conjunction with the Cardinal Security Access Form and instructions to request the appropriate Core user access to the Cardinal system applications (Financials, Human Capital Management, and Business Intelligence). Core user access is access that is required beyond Employee Self-Service (ESS) access.

The Cardinal system utilizes a combination of roles and permission lists to grant access to the Core user. Each agency is established as a Business Unit in Cardinal and each user in Cardinal is assigned a Primary Permission List for each applicable application. These permission lists determine the Business Unit(s) that the user can access within the application. The purpose of the Primary Permission List is to prevent users from being able to modify or view data for other agencies. A user can only view, enter, or process transactions for Business Units included in their assigned Primary Permission List.

Roles provide access to pages (functions) within Cardinal. Users need to be assigned the appropriate roles in the Cardinal System to have access to do their jobs. This Cardinal Security Handbook is designed to help agencies determine the correct roles for Cardinal users.

The following sections of this handbook are applicable for all Cardinal applications.

## Cardinal Security Officers (CSO)

The Cardinal Security Officers listed on the Department of Account (DOA) Authorized Signatories Form (DA-04-121) have been granted authority to authorize the Cardinal Security Team to add, update and delete users in Cardinal who are preparers, approvers, and/or viewers of transactions in Cardinal. By accessing a transaction/data in Cardinal, the agency, department or institution, and its employees and agents, agree to the certifications contained in the Commonwealth Accounting Policy and Procedure Manual for the applicable transaction(s).

## Cardinal Security Form

Who should submit a Cardinal Security Form?

- If an employee is an HCM ESS only user (no core access) then a Security form is not required to grant or remove the HCM ESS roles. Keep in mind, the terminated employees will still have limited ESS access (Terminated Employee Self Service V\_TERM\_EMPL\_SS) 18 months following their termination and then the system will automatically terminate this ESS access.
- If an employee requires any type of core access (any access beyond Employee Self Service) in HCM or FIN, a Security form is always required to grant access. When an employee is terminated in HCM HR setup, the system will automatically remove all cores access and regular ESS access, and grant terminated ESS access (Terminated Employee Self Service V\_TERM\_EMP\_SS) for 18 months.
- If a user account is not associated with an employee id (contractor, audit user accounts, HR Level 4 employees), a Security form is required to grant and/or remove access.

The Cardinal Security Form must be completed by the applicable agency's Cardinal Security Officer (CSO). The form should include required signatures prior to submitting to the Cardinal Security Team, in order for access to be granted in Cardinal.

The Cardinal Security Form (SE-SW-001) can be found on the Cardinal website at [www.cardinalproject.virginia.gov](http://www.cardinalproject.virginia.gov).

Use this form to:

- Assign users to core roles within Cardinal
- Update existing Cardinal core user information
- Remove/Lock out users no longer requiring certain roles or to lock out contractors, audit users or HR Level 4 employees access to Cardinal

The Cardinal Security Officer will submit the completed form to the Cardinal Security mailbox at: [cardinal.security@doa.virginia.gov](mailto:cardinal.security@doa.virginia.gov)

## Primary Permission Lists

Primary Permission lists grant the user access to view, enter, or process transactions (as authorized via the corresponding Cardinal User Roles) for all Business Units included in the Primary Permission lists. For information on these lists, please reference the Cardinal Primary Permission list spreadsheet on the Cardinal Project website at [www.cardinalproject.virginia.gov](http://www.cardinalproject.virginia.gov).

When requesting access to Primary Permission lists designated as a “Statewide Access Group”, it is the Agency Cardinal Security Officer’s responsibility to ensure Agency Management is aware of, and concurs with, the user’s need to access statewide information, in order to perform assigned job duties. The agency also acknowledges adequate procedures and internal controls have been implemented at the agency to help ensure all extracted/downloaded data is stored and maintained in accordance with VITA Information Technology Resource Management (ITRM) Standard SEC501-09.

In addition to the requirements stated above, any Cardinal Security Form requesting access to a Statewide Primary Permission Lists will require approval/signature from a designated Cardinal DOA Approver.

## Cardinal User Roles

Roles provide access to pages (functions) in Cardinal. Use the Cardinal Security Handbook as a reference when completing the Cardinal Security form, as it defines Cardinal roles by functional area.

You will find the following information in the handbook regarding Cardinal roles:

- Descriptive Role Names
- Role Descriptions & Other Role Considerations
- Segregation of Duties (SOD)/Restricted Roles (RR)
- Additional Approvals Required

## Segregation of Duties Policy Exceptions

Several combinations of Cardinal security roles are noted as potential Segregation of Duty (SOD) conflicts in this handbook. As a general rule, SOD role combinations will not be granted to Cardinal users. Exceptions can be requested by agencies with limited staffing or special circumstances. Before completing or submitting a security form where a SOD role combination conflict is being requested for a user, the agency should first complete the following steps, in order to obtain approval for an agency SOD conflict exception.

- Submit a written request on agency letterhead and signed by the Agency Head to DOA’s Director of General Accounting (email: [gacct@doa.virginia.gov](mailto:gacct@doa.virginia.gov)) that includes:
  - Exception requested
  - Justification for the exception
  - Description of the internal control implemented by the agency to mitigate the lack of separation of duties

DOA General Accounting will notify the agency in writing if the exception is granted. Once the SOD Exception has been approved by DOA General Accounting, the agency should take the following additional steps when submitting a Cardinal Security Form (SE-SW-001) for any user requesting SOD conflicting role combinations:

- Complete the Cardinal Security form (flagging the SOD Exception), attach a copy of the DOA General Accounting notification granting approval of the **applicable** agency exception

- Scan and email the form and exception approval notice to DOA's Director of General Accounting (email: [gacct@doa.virginia.gov](mailto:gacct@doa.virginia.gov))
- DOA General Accounting will sign the form, scan and email the approved form to Cardinal Security at [cardinal.security@doa.virginia.gov](mailto:cardinal.security@doa.virginia.gov) and to the Cardinal Security Officer for that agency.

### **Restricted Roles**

As noted in the tables that follow, certain roles are designated as Restricted Roles (RR). It is the responsibility of the agency Cardinal Security Officer to ensure Restricted Role criteria is met before assigning these roles to agency users.

### **Buddy Roles**

In some cases, two roles in Cardinal must be assigned together for the user to have the appropriate access to perform system tasks (e.g., in HCM the Absence Supervisor role needs the Time & Labor Supervisor role). If you select a role on the security form that has a buddy role associated with it, and the corresponding companion role is not checked on the form, the form will be rejected until all roles are selected properly.

The following sections of this handbook are applicable for the Cardinal Financials (FIN) application.

## Accounts Payable User Roles

Accounts Payable (AP) is the main source of all non-payroll payment information for a financial entity. AP includes the following processes:

- Establish and Maintain Suppliers
- Enter and Process Vouchers
- Expense Processing
- Process Payments
- Process 1099

## Accounts Payable Workflow

Workflow is an automated process that takes a Cardinal transaction and routes it to the next approver level for action (approve or deny).

## Expenses Workflow

Expense transactions are routed for approval based on Department IDs

The following Expense role(s) are tied to workflow:

- **Expense Approver**

As a general rule, only employees can be assigned to the Expense Approver role because it deals with the approval of expenses. Non-employees cannot be assigned to this role. When an expense transaction is entered for an employee, the person who is identified in Cardinal as their supervisor in their expense profile will be the first level of Cardinal approval for online agencies with Expense Workflow Option 1. The supervisor approver level does not apply for agencies with Expense Workflow Option 3 and for interfacing agencies.

Please use the information provided below to select the appropriate Expense Approver workflow profile for your users in Cardinal and list the department ID ranges for which the user will approve. **A user can only be assigned to one of the below expense approver profiles and only one user per profile/department range combination.**

Expense Approver Profile	Profile Description
<b>Fiscal Officer</b>	Approval of all expense reports, travel authorizations, and cash advances. This approval level is optional for online agencies.
<b>Agency Head</b>	Approval of expense reports and travel authorizations containing expense amounts over the allowable amount and/or over \$1000. Interfacing agencies will not have the Agency Head approval level in Cardinal.
<b>DOA Pre Audit</b>	Approval of expense reports for Capital Outlay projects. This role may only be selected by employees of the following agency(s): Department of Accounts – General Accounting

## Voucher Workflow

Users assigned the following role will be assigned the agency specific route control profile(s) in order to properly route transactions for approval. Route control profiles are assigned to users to identify the areas on which they work.

- **Voucher Approver**

If the user is assigned to the Voucher Approver role, agencies will need to identify the Business Unit number(s) for which that user can perform approvals.

## Accounts Receivable User Roles

Accounts Receivable (AR) is the functional area that handles a series of accounting transactions dealing with funds receipts. AR includes the following process:

- Enter Funds Receipts

### AR User Roles & Descriptions

## **General Ledger Workflow**

Workflow is an automated process that takes a Cardinal transaction and routes it to the next approver level to approve or deny. The GL Journal Approver is tied to workflow.

Users assigned to the following role will be assigned the agency specific route control profile(s), to properly route transactions for approval. Route control profiles are assigned to users to identify the areas on which they work.

- **Journal Approver**

If the user is assigned to the Journal Approver role, agencies will need to enter the Business Unit(s) for which that user can perform approvals.

### Statewide Central Roles - FIN

Statewide Central Roles are only available to select agencies and/or operations, for example: Department of Accounts (e.g., General Accounting, Commonwealth Vendor Group (CVG), Department of Taxation, etc.). It is the responsibility of the agency Cardinal Security Officer to ensure Statewide Central Roles – FIN meet the Restricted Roles criteria.
