

Creating and Uploading Budget Spreadsheet Journals Overview

When entering Budget Journals with many Lines, using the Budget Journal spreadsheet upload functionality in Cardinal can simplify the process for entering the data and save time.

To upload a Budget Journal spreadsheet, the user must first enter the Journal information in an Excel spreadsheet. The user then initiates the Excel macro to write the Budget Journal data to a .xml file that is then uploaded into Cardinal.

Navigation Note: Please note that there may be a **Notify** button at the bottom of various pages utilized while completing the processes within this Job Aid. This “Notify” functionality is not currently turned on to send email notifications to specific users within Cardinal.
